EXAMINER'S COMMENT

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Claims

2. Claims 1-9 and 21-29 are allowed.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed September 30, 2008 regarding the priority date of the Funk reference have been fully considered and are persuasive. A thorough search of the prior art of record did not disclose any reference, alone or in combination with other reference(s) that teaches or fairly suggests agent molecules for the chemical grafting of hydrophilic polymers to a plurality of fibers wherein an amount of radical polymerization initiator molecules used in a reaction to graft the hydrophilic polymers to the plurality of fibers is at least three times the amount of the agent molecules by weight. The prior art of record does not disclose **the claimed relative amounts of initiator molecules and agent molecules, nor does the prior art suggest the claimed relative amounts, as there is no motivation to modify such a ratio, since the ratio results in the specific and unique properties of the resulting product.** . The recited liquid-strike-through time for a fifth gush of liquid and nonwoven fabric surface tension recited in claims 1 and 21 are properties whose magnitude is dictated by the composition of the fibers with hydrophilic polymers grafted thereto. This composition depends at least upon the amount of

agent molecules which facilitate the grafting process. The recited properties are therefore neither inherent nor obvious properties of the prior art of record, since the claimed amount of agent molecules relative to the amount of initiator molecules is not inherent in or obvious over the prior art of record. Since the prior art of record does not teach or suggest the claimed invention with regard to the relative amount of agent and initiator molecules, the claims are patentable over the prior art and in condition for allowance.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
